

Jacob Lee

Sacramento, CA 95831 • JLee1231@calpoly.edu • (916)-513-5069 • [LinkedIn](#)

Education

California Polytechnic State University

B.S. Computer Science, Concentration in ML/AI; Minor in Linguistics GPA: 3.9

San Luis Obispo

June, 2027

Coursework: Software Engineering, Programming Languages, Artificial Intelligence, Systems Architecture, Computer Security, Design of Algorithms, Data Structures, Object Oriented Programming, Ethics in Technology

Experience

Algoverse

Reinforcement Learning Researcher

San Francisco, CA

June 2026 – Present

- Developed a **Gymnasium-compatible POMDP testbed** to distinguish reward misspecification from observation insufficiency, modeling 2 latent states, 2 actions, and 4 controlled RL failure conditions.
- Implemented reproducible **Q-learning and PPO pipelines** across 4 conditions $\times$ 5 paired seeds, conducting 20 training runs per algorithm and collecting **10K+ PPO transitions per run**.
- Engineered separate **passive and privileged telemetry pipelines** capturing policy probabilities, value estimates, TD residuals, rewards, and trajectory metadata while preventing latent-state and intended-objective leakage into diagnostic features.

CodeBox Mustang Maps Project

Software Engineer

San Luis Obispo, CA

October 2025 – June 2026

- **Developed UI features and utility classifications** for Mustang Maps, a Cal Poly SLO-focused mapping application supporting classes, events, campus facilities, and utilities.
- Collaborated with a large software engineering team using GitHub for version control and shared development workflows.

Cal Poly

Volunteer Undergraduate Research Assistant - Cal Poly Agentic AI Team

San Luis Obispo, CA

August 2025 – February 2026

- Collaborated on a research initiative developing an AI-driven multi-agent system for search and rescue, designed to identify high-priority targets and optimize pathing for rescue operations
- **Tested deployment of an Agentic AI system across AWS, Azure, and GCP** to evaluate performance, scalability, and cost efficiency for identifying high-priority search targets and optimal rescue paths

TOMS Accessibility Project with 40 Prado Homeless Services Center (CAPSLO)

Software and Hardware Developer

San Luis Obispo, CA

March 2025 – June 2026

- **Programmed and integrated Arduino microcontrollers** to develop an automatic door system improving accessibility of the facility and services for individuals with disabilities.
- **Modeled mechanical components and linkage mechanisms**, wrote control software, and conducted on-site assessments to ensure accurate installation and reliable performance.

Additional Experience

Kaiser Permanente

Pharmacy Administration Assistant Intern

Sacramento, CA

June 2022 – May 2024

- Implemented data storage security protocols across the KP Sacramento Valley region and automated onboarding workflows for new cybersecurity protocols, **reducing manual setup time by 40%**
- Conducted research and an internal survey to improve member satisfaction in outpatient and inpatient pharmacy departments, contributing to a **JD Power score of 630 the following year (#1 in California)**

Technologies: Python, React, React Native, Pandas, Gymnasium, TypeScript, Swift, Java, C, SQL, GitHub

Interests: Board Games, Magic (slight of hand), Ukelele, Learning Spanish, Pickleball
